

ARIES (Mar 21–Apr 20)

Be prepared to make important decisions that will affect your love life in 2022. On the one hand, independence and freedom will appeal and yet simultaneously you'll be drawn to create more stability in your life. Singles may conclude that freedom is worth more than security and companionship, and couples may be drawn to creating a sense of security regardless of what sacrifices must be made in other areas of your life.

Key turning points will be mid-May and the end of October. Choose wisely!

TAURUS (Apr 21–May 21)

In 2022, you'll develop a fresh approach to someone special - and to yourself! Already in January, you may see shared commitments, duties and interests in a new light. Then, the eclipse seasons will prompt you to make long-overdue changes at the end of April through to early May and at the end of October to early November. Singles may wish to commit to someone special and couples to reconfigure how you share your life.

Plan a treat or a break in November - it's a lovely time for romance.

GEMINI (May 22–Jun 22)

You will explore new avenues in 2022, and will turn a corner in your love life. The theme is very much of renewal, especially in January, May and November. These months may also be tense; some Twins may discover secrets or will reveal them. Singles will be surprised by the characters you are drawn to and you may even look for commitment.

Some couples will look for more spontaneity after being in a rut, or will infuse your relationship with more passion.
