
CAPRICORN (Dec 22–Jan 20)

For the first six months of 2022, your focus will be on meaningful relationships and, after July, you'll look for more spontaneity and freedom of movement. Singles will wish to remain single. That is, apart from a strong attraction around St Valentine's Day! April will be a turning point in your love life. Couples will enjoy deepening ties and if you wish to start a family, this could be the year it happens.

Towards December, you will gain a clearer understanding of your commitments.

AQUARIUS (Jan 21–Feb 19)

Your relationships will alter in line with your changing values and interests. You may be surprised by revelations and perhaps even by your own responses to people's circumstances. Singles may begin to look for company that is as diverse as the changes in your life. Stress points for partnerships will occur in January, April, May, October and November.

During these times, bear in mind that those you love may be finding life difficult and therefore a compassionate approach will work wonders.

PISCES (Feb 20–Mar 20)

You'll benefit from spending time on self-development as this will bring more peace and serenity, sexiness and passion into your love life. Focus on good communication skills, especially in May and November. July is a turning point in your love life: it's a sizzling month. If you've been planning a family, this month could be a turning point in your ventures.

Aim to collaborate when making decisions in your love life as a rigid response to a partner will cause stagnancy.
